

# ENHANCEMENT DETAIL

**EST TIME: 1 DAY  
FROM £400**

The enhancement detail is a specific package, generated for excellence, for your vehicle. It includes a single stage machine correction, to restore a deep level of gloss to your vehicles paintwork. This enhances the colour of your vehicle, adding richness, depth and significantly enhancing levels of gloss. The difference is night and day.

The single stage refining process is capable of removing typically 65% of the swirl marks that may currently be present and will most certainly achieve a massive amount of added clarity to the finish of your paintwork. If you strive to have that "glossy finish" then this may just be the package for you. Included within this detail is an extensive wash process & full body decontamination carefully compiled by us to prepare your vehicle for machine refinement.

# ENHANCEMENT DETAIL

## AN EXTENSIVE SAFE WASH PROCESS IS CARRIED OUT ON YOUR VEHICLE, FOLLOWED BY;

- 1.** Wheels and Tyres are deep cleaned using dedicated Wheel and Tyre cleaning products
- 2.** Two separate snow foam stages using different mixed ratios & varying thickness to prepare the vehicle for contact cleansing. During the second coverage, all intricate areas of the exterior are revised using a range of detailing brushes tackling overlooked areas such as window seals, grilles, arches, badges and nooks & crannies. There is not an area that goes unnoticed.
- 3.** Moving onto a three-bucket contact wash using the utmost care, grit-guards and mitt-motion techniques. Full wheel & brake decontamination stage agitating stubborn brake dust & tar spots typically left behind by common car washes. This stage incorporates an iron fallout breakdown process crossed with a general wheel detail.
- 4.** Full exterior tar breakdown & iron extraction is carried out, followed by clay-barring, promoting a silky-smooth finish whilst removing all contamination from the surface ready for machine polishing.
- 5.** Once satisfied with the preparation stage we will then head into machine polishing. The latest leading quality products are applied to achieve the best possible results.
- 6.** Finally comes the dressing and presentation stage. All pre cleaned tyres are dressed for longevity boasting a slick, black finish along with any corresponding trims on the vehicle that need replenishing. Exhaust tips are revived, cut and metal polished bringing them back to their former glory.
- 7.** Basic interior vacuum and clean carried out to refresh and give it that 'new car feel.

## OPTIONAL EXTRAS
